

# Tytuł szkolenia: Introduction to DevOps

## Kod szkolenia: H9P61S

### Wprowadzenie

This course introduces the fundamentals of **DevOps**. It explains the key concepts that underpin DevOps and helps attendees to understand the benefits that a DevOps approach could have for their own organizations, and potential problems that should be addressed. The course includes discussion of people, process, and technology aspects of DevOps, and provides practical suggestions of steps that attendees can take to start introducing DevOps.

### Adresaci szkolenia

- Senior IT management, IT development staff, IT operations staff, IT process owners, business managers, business process owners
- Individuals who require an understanding of DevOps and how it can contribute to the success of IT within an organization
- IT professionals who are working in an organization that has adopted DevOps and need to be informed about DevOps so that they can operate effectively within the organization

#### Prerequisites:

There are no specific prerequisites for this training, but knowledge and experience of how an IT organization works would be helpful. Those attending this course could benefit from purchasing and reading the following book: DevOps - A Business Perspective by Oleg Skrynnik

### Cel szkolenia

On successful completion of this course, candidates can expect to gain knowledge of:
